

This is an invite to all ECMS members to become involved with our medical students at the Windsor program of the Schulich Medical and Dental School. We are looking for mentors. Anyone interested in mentoring the 4th year medical student projects can help. We would like to put a large list together of physicians in our area with areas of special interest highlighted so our students could choose a perfect mentor. As an example, Dr. Tamara Siddall has offered, with a special interest in adolescence medicine.
